### **WAS BRED TO:**

Reg.Name of Stud

Reg.#

Sire:

Dam:

OFA#

Dates of Mating

### **Conditions Stud Owner Agrees To:**

1. Provide bitch owner with copy of the stud's registration papers and pedigree of the stud dog.
2. Fill out litter registration form and promptly return to bitch owner.

3. Provide a return stud service if no pregnancy results from the mating with no stud fee charge within one year of the original mating.

\*\*\*In order to receive the return service, the bitch owner must notify the stud dog owner of failure to conceive in writing, not more than 70 days following the mating.

4. Have the stud in good condition and health with a negative Brucellosis test.

5. The stud dog owner shall be held harmless of any all liability, except as stated herein this contract.

### **Conditions Bitch Owner Agrees To:**

1. Present Bitch in good health, up-to date on vaccinations & worming, and in season.

2. Take precautions to make sure the bitch is properly confined following the breeding to ensure no other dogs breed her accidentally, before her season is finished.

3. To pay the agreed stud service price, in house expenses for breeding (if applies) and all veterinary costs (if any or incurred).

\*\*\*We guarantee our stud service if your female doesn't become pregnant we will provide a return mating to the same bitch or replacement bitch if she becomes unable to be bred with no additional stud fee charge for up to one year of the original mating.

**Boarding: \$10.00**

**Bath: \$10.00**

**Bath & Nails: \$15.00**

**Shipped Semen: \$75.00-\$125.00**

## STUD SERVICE & BREEDING INFORMATION:

We would like to know when your bitch comes in heat. Keep track of when the first signs of the female's heat cycle begins, (vulva swelling, starts bleeding/spotting). This will give us an idea when she will be ready to ovulate.

You may board your bitch with us and we will let our males breed her every other day until she is out of heat. We also have the ability to do in house progesterone testing and take her to our vet for quantitative progesterone testing (if wanted) and artificial inseminations. These services have an additional cost and are only used if needed because the female will not breed naturally or by request of the owner of the bitch. We also can ship cooled semen for an additional shipping cost. The shipping price varies from \$75-\$125 depending on where it is being shipped and whether it is a weekday or weekend.

We can start doing the in house progesterone test between day 5-7 that will show a color change/progression as the bitch progesterone levels rise telling us when she has ovulated and it is time to breed.

After ovulation occurs it takes the eggs 48-72 hours to be mature enough to become fertilized. So the optimum time to breed with artificial insemination is 2 days after ovulation.
